## CHALLENGES AND DEVELOPMENT (Response in 500 characters, including spaces)

**This form is intended for professionals experienced in Cyber Security and in Data & AI, go straight to the point, with concrete information and showing the added value of your offer. The most concise answers are often the best, so pay particular attention to simplifying your answers.**

1. What are the issues that you address?

2. How do you present your solution to a banking contact who is an expert in your field (use cases)?

3. What is the innovative feature of your solution and where does it come from (genesis of the idea and specificity of the value proposition)?

4. What are the competing solutions and how do you differentiate yourself in terms of added value?

5. What is the level of development of your product? Have you got your first clients?

6. What are the values you defend and the commitments you make to Corporate Social Responsibility?

7. What are your challenges 6 months down the line?

8. What are the technological prerequisites and the rollouts facilities of your solution (nature of the data, technological infrastructure used, use of cloud components, level of compute resource required, IS brick on which the technology is to be deployed)?

9. Product presentation web page

10. Product demonstration video: Youtube, Dailymotion, Vimeo... (URL)

11. How did you hear about the price?
